The "scholar in politics" has spit on his hands to get a fresh hold.

Keep your eye on the little boodle gang. They want a fair vote and an honest count.

What will it profit a voter if he should sell his vote for a few MacVeagh's dollars and lose his job?

The Democratic campaigners should bear in mind that when met desperate they are apt to do some mighty foolish things.

FRANKLIN MACVEAGH wants "tariff reform" so much that he is willing to pay for it providing he can draw a United States Senator's salary in connection with it.

The shares of two English iron companies have advanced \$750,000 in value since the Democratic tariff was promulgated. These Englishmen regard the tariff as immensely valuable to the trade.

When the Fifty-fourth congress assembled in December, 1895, the shrinkage in values and loss of wages will doubtless be much greater than the cost of the war, while the national indebtedness will have increased.

When a prominent Democratic candidate and a party leader have time enough and are desperate enough to walk ten blocks to do up a colored wood-sawyer, and one holds him while the other skins him, it looks very much as if Democratic votes were needed very badly.

On the eve of the election a Washington dispatch announces a \$12,000,000 deficit for the month. Goods are very low in Europe and under a revenue tariff can be sold very low in this country, but and idle people cannot buy them at any price and therefore imports are even less in Oct. 1894, than they were in 1893.

It is a curious fact that the new tariff advances the duty on cut nails from 18 1/2 per cent to 25 per cent. As Wheeling, W. Va., is the center of the cut-nail industry Chairman Wilson can hardly be averse to fixing up a few neat exceptions to free trade for his own state. Wilson's cut nails deserve to be celebrated along with Murphy's collars and cuffs.

The deficit for the fiscal year ended June 30 last reached the total of \$70,000,000. To meet this, and to replenish the depleted gold reserve, \$50,000,000 of bonds were issued, increasing the interest-bearing debt by that much, and adding to the interest burden. Yet the drain upon the Treasury has been so great that the gold reserve is below \$60,000,000.

It will be worth more to any voter to have the Republicans returned to power than all the money he could get as a voter out of a Democratic boodle fund. This may not look reasonable at first sight, but when we recall the fact that the falling off in wages last year was \$1,000,000,000, on account of the return of the Democrats to power, we have some idea of what it is worth to labor to have the Republicans in control of the government.

On the principal manufacturing industries the new tariff reduces the average duty to about 35 per cent, but there is far more than a 35 per cent difference between American and European wages. And the difference is still greater between American wages and South American or Asiatic wages—the wages of British India, for example, whose products are by the new Democratic tariff placed in direct competition with those of American labor.

### Why Wheat Is Low.

The Indiana Farmer, an agricultural paper, gives a very clear and comprehensive reason why the American farmer is suffering the present low prices for wheat. After stating the well-known

fact that European millers do not buy American wheat because they can buy European and Indian wheat cheaper, and that even with the superior wheat of America they could not make as good flour as American millers make, and that for this reason American wheat cannot compete with European and Indian wheat in the European market, except in the form of American flour, the Indiana Farmer says:

The millers of this country, through the Winter Wheat Millers' League, an organization formed for the exclusive purpose of extending the markets for American flour, have asked congress to enact retaliatory laws whereby the luxuries, purchased only by those rich enough from the countries maintaining high tariff duties against American flour, might be charged a double duty until they were willing to reciprocal treaties to allow our flour to enter their markets on a more equitable basis. Notwithstanding the fact that every barrel of flour exported represents 4 1/4 bushels of wheat, congress at its last session refused this request and passed a bill in which many of these luxuries were placed on even a lower rate of duty. The millers further asked that the reciprocity feature of the then existing tariff law be allowed to remain in force. This was also disregarded, and as a result Spain has abrogated her reciprocity treaty with the United States as to Cuba, and Brazil has given notice that her treaty will be abrogated January 1st, next. To Cuba, the mills of this country shipped last year nearly 900,000 bbls. of flour, where scarcely any had been shipped before the treaty was effected. The amount shipped to Cuba last year exceeded the amount shipped the previous year by 80,000 barrels. To Brazil was exported 920,000 bbls., an increase over the year before of 100,000 bbls. Spain has already advanced her tariff duty on flour from 40 cents to Cuba from \$1 per bbl. to \$4.75, or 75 cents higher than from any other country. Brazil will restore her old duty, which was equal to a prohibition. The mills have thus lost a market which would have taken this year over 2,000,000 bbls. of flour. Figuring this at 4 1/2 bushels to the barrel, we find a loss to the American farmer of a market for fully 9,000,000 bushels of wheat. Further than this, the flour shipped to those markets was all made from winter wheat, no spring wheat flour going there. It is a well-known fact that neither of these countries have flour mills, so that a market is absolutely lost to the winter wheat farmer for that much wheat. In fact, these facts, is it any wonder that wheat remains at the present low price? Congressmen should be committed to extend the markets for American flour. That the surplus wheat we have can be worked off best through the mill is self evident from facts given above. Therefore, it seems as if the farmers should be with the miller on such a proposition.

## MUNICIPAL CLUB OF DECATUR.

### Declaration of Principles:

We, the members of the Municipal Club of Decatur, inviting the co operation of all our fellow citizens, hereby declare and pledge ourselves to the enforcement of the following principles:

First—We, as citizens of Decatur, believe that our highest interests will be materially promoted by the absolute separation of municipal government from national and state politics.

Second—Realizing that respect for law is the bulwark of liberty, we demand a vigorous observance and enforcement of all our laws, and we pledge ourselves to nominate or endorse only such candidates as we believe to be in favor of such enforcement. Honest and capable of properly administering the affairs of our municipal government.

Third—We advocate practical extension of the highest principles of civil service reform to our municipal department.

Fourth—It will be the special object of the Municipal Club of Decatur to make a thorough and scientific investigation of the correct principles of local self-government, especially as adapted to this municipality, and to collect and publish all appropriate information on the defects and needs of the city government. While the members of this club may be members of widely different social and state organizations, all will be united in common purpose of obtaining the best city government and the wisest expenditure of money, advancing the material growth of this municipality and of stimulating that spirit of progress in her citizens which will secure for them and descendants the largest measure of domestic comfort and commercial prosperity.

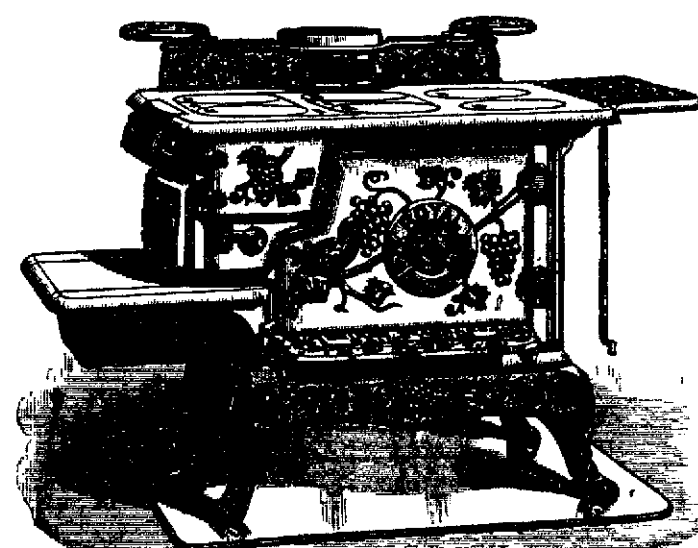

Being in hearty accord with the declaration of principles of the Municipal Club of Decatur, I hereby subscribe my name as a member thereof:

The Democratic Wheels and Weals and

Woes, but Everything is Lovely

Where the Office Goes.

—

The Democratic party in Macon county

was great when the result of the election

was announced in 1892. There was not

one, from the least to the greatest, who

would have given the roster out of his

hat if the transfer of that souvenir

would have insured him a deed to the

earth. Each thought he owned the

earth or at least the Democracy owned

it on the Bellamy plan and that each

one would produce and consume what

he pleased and ask no odds

of anyone. They all joined hands

and vied with each other in

celebrating the advent of Democratic

glory in a procession which was charac-

terized by a tin coffin supposed to con-

tain the soul and body of McKinley, a

representation of Tammany supposed to

contain the soul and body of Democ-

racracy, a crate of cats supposed to re-

present the Democratic idea of "wild cat"

money, and various other emblems to

represent the happiness and prosperity

that victory would bring the people.

But while this shouting, godly, reform

contingent were supposedly bearing the

Democratic ark to a permanent and safe

repose, designing men were turning over

in their minds certain plans to seize the

entire bakery, and before the sun arose

next morning, the firm of Montgomery,

Bragg & Co. had been organized and

seized the "goodly Babylonish garment

and the wedge of gold" and had hid it in

the tent.

Albert G. Webber, who had acted as

high priest and who had solemnly

advised members of the church to

vote the Democratic ticket and get bet-

ter wages and freedom from interference

with parochial schools, went into his

closet and consulted the Urim and

Thummim that sparkled in his breast-

plate and translated the pencilings of

light into visions of railroad tracks and

headlights, and he treasured away in

his heart the office of railroad and ware-

house commissioner.

B. K. Durfee had also been in the

campaign and had wept as profusely

and long over the deplorable condition

of the workingmen in 1892 as Mr. Web-

ber, or any other philanthropist after an

office could do. In addition to this,

Durfee had long been regarded as the

oracle of the party; so long, indeed, that

it was not thought robbery by him to

assume as much himself, and he had

carefully made himself solid with Alt-

geld, and with this advantage it re-

quired little time for him to select his

job. And as time rolled along, the

political wheel turned in his favor,

and he had the office of penitentiary

commissioner in his pocket, while Web-

ber had to be content with the privilege

of sending to Pennsylvania for a relative

who had been appointed chaplain of the

Illinois penitentiary. In addition to this

Webber was conceded the position of

grand strategist on the staff of the party

leaders.

Montgomery, Bragg & Co. undertook

the task of coruiling all the local offices

that lay around loose. The silent mem-

ber of that firm was Senator Manecke.

He was willing to take his chances on a

return to the senate, but those who held

the controlling interest in the concern

required of him his kind offices in land-

ing the postoffice. Several worthy gen-

tlemen, old wheel horses in the party,

each expected this desirable plum to fall

into his lap, but Manecke's influence with

Palmer and Springer was too much for

them and Manecke landed Jerry Dona-

hute, the choice of the company, and it

in turn put Manecke on the ticket for

senator and all the aspirants and their

friends who have been so unceremoni-

ously turned down by the new concern

will have to walk up on election day and

take their medicine though they have

been slain by those who got the wedge

of gold. The poor workingman has

been forgotten. Salaries are more com-

## ARTISTIC BRICKWORK.

Hints for Persons Who Think of Constructing a Fireplace.

There seems to be a general idea that the brickwork about a fireplace must end a short distance above the opening; but in that case the best effect of the brickwork is lost. In the case mentioned, it is carried up to a height of over six feet, forming a mantel and a handsome panel above, in which may be placed with excellent effect a marble clock. The opening in the fireplace is three feet wide and three feet high, and has a number of courses of bricks above the opening that is shown in the cut. The panel is three inches deep, and the upper course of brick in the mantel

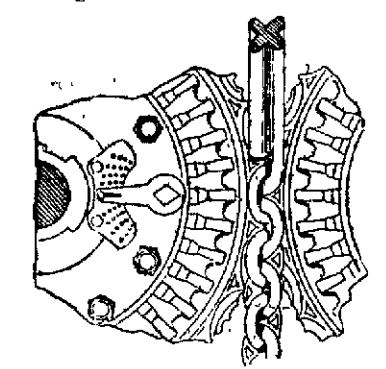

projects three inches, giving a mantel of six inches; but the design is to have a slab of red granite fitted above the projecting bricks which will project an inch over the upper course.

The bricks are dark red pressed, laid in red mortar, made by mixing dry Venetian red paint with common mortar. It will take 400 pressed brick to construct such a chimney and mantel, the backing of course being done with common brick, and about 25 pounds of Venetian red to color the mortar. The brickwork should project a little into the room, to give the best effect. In the back of the panel may be set a mirror of plate glass which will very beautifully reflect the color of the brickwork. Old-fashioned brass andirons with shovel and tongs will go admirably with such a fireplace.—Webb Donnell, in Country Gentleman.

## WELDLESS STEEL CHAINS.

A New Method of Making Them Invented in Germany.

Several months ago we described a process of making steel chains without welding the metal to form the links.

A bar of steel having a cross section like a Greek cross was fed through a series of punches, which took out bits of metal here and there systematically, and left a collar about 33 per cent. stronger than the ordinary one. That method was tried in Birmingham, England, with satisfactory results, and is still in use. A new pin originating with Herr Klattke, of Neuweid, Germany, was described at a convention of iron manufacturers at Dortmund a few weeks ago. This inventor takes a bar rolled to a similar shape as at Birmingham, and feeds it between two carefully adjusted wheels driven by gearing and having on their peripheries cavities and projections corresponding to the form of a link. The metal is hot when thus manipulated. One squeeze nearly completes the chain, but the latter has to go through two more operations entirely to detach the links and press them into the desired shape. A speed of twelve feet a second between the moulding rolls is allowable, although better work is done at a lower rate.—N. Y. Tribune.

## New Cure for Consumption.

From Kharkov, in Russia, comes a story of a new cure for consumption by the inhalation of aniline, discovered by Dr. Kremiansky, a professor in the university. A girl of thirteen, in the last stages of rapid consumption, was brought to him last February. She was treated with three preparations used simultaneously, pure white aniline, C<sub>6</sub>H<sub>5</sub> (NH<sub>2</sub>), a preparation of aniline and thionol, and one of aniline and aniline of pine, which she was made to inhale deeply and slowly. At first only 10 to 30 inhalations a day were administered, but gradually they were increased to 200. Under this treatment and a special diet the child is said to be now in perfect health.

## ONE MORE RECORD.

Captured by the Cleveland Riding Team Yesterday—Other Records.

Notwithstanding the severity of the weather and drizzling rain yesterday a good crowd witnessed the trials at the track and the breaking of the sixth world's record that the Cleveland racing team have captured over the fast Decatur track.

Dr. A. I. Brown did a third of a mile in 34.2 seconds, being paced the first half of the distance by Anderson and Coburn, and the last half by Bernhart and Goetz. The effort of the Cleveland sprinter clipped a fifth of a second from the previous record for that distance.

## WILL LEAVE TO-MORROW.

Last evening Manager Hoyt, of the Cleveland racing team received word from H. A. Lozer & Co., the makers of the famous wheel, calling to Toledo the racers. It was entirely unexpected by the riders, but it is thought they will reorganize and go south on a still further record-breaking tour. E. E. Anderson left last night for Chillicothe, Ohio, to join the Stearns racing team and L. D. Cabanne and J. Coburn, after to-day's trials, will leave for their home in St. Louis for a brief rest. The remainder of the team will go to Cleveland and Toledo, their homes, and enter the employ of the house. Trainer Culver's contract expires with the house to-night and he will go to St. Louis to-morrow. The riders, however, are expecting word from the house at any minute, and their plans may be very materially changed.

## JOHNSON'S FAST MILE.

John S. Johnson made a mile over the Tonawanda boulevard yesterday at Buffalo, N. Y., unpaced, in 1:57 4-5, breaking the record of Walter S. Sanger, of 2:07 1-5, made this year at Springfield, and by covering the half mile in 55 3-5 he broke the record for that distance, also made by Sanger and made at Springfield on the same day that he captured the mile record. Every precaution was taken to surround the race that it would go on as an established record. The electric timing apparatus was used, and as this sounded a bell, at the quarters, start and finish as the rider passed each, it was possible for the timers at each place to take the time for the quarters, and then by comparing the watches the time could be verified. Three watches were stopped on the mile, one making it 1:57 3-5, another 1:57 4-5, and the third 1:58 1-5, but the official time was given as 1:57 4-5.

## PEDALING.

The Cleveland team this afternoon are at the track. "Dute" Cabanne will go after the 1/2 and 1/4 mile records. The 1/2 mile record was broken yesterday, but they want to cut off a larger slice. The machine which Johnson used in riding the straightaway mile recently weighed 17 1/2 pounds. It was geared to 72 inches and the pedals revolved 94 1/2 times in 1 minute 33 2-5 seconds.

## How Snakes Move and Climb.

A snake moves by the means of his ribs and the strong scales on the abdomen, to which the several ribs are attached by a series of short, stout muscles. These scales take hold of the surface over which the reptile may be passing, and aid the creature in gliding along. In this manner they climb trees, often with great agility, either ascending spirally or climbing straight up the trunk, but in the latter case a rough-barked tree is always necessary.

## Blue Ink for Use on Glass.

A blue fluid for writing on glass, which is not attacked by water, can be made, according to Neueste Erfindungen und Erfahrungen, as follows: Shellac, bleached, 10 parts; Venice turpentine, 5 parts; oil of turpentine, 15 parts; indigo, in powder, 5 parts. Mix the shellac, turpentine and oil of turpentine, and place in a waterbath, under gentle heat, until solution takes place, and then stir in the indigo.

## DEATH OF HENRY GOSSETT.

He Was a Veteran and Was in the Monitor When the Merrimac Got Licked.

Henry M. Gossett, the well-known carpenter of French descent, died this morning at 7:30 o'clock at his home, 461 South Water street, of asthmatic congestion of the lungs, aged about 54 years. The deceased had been afflicted with rheumatism for quite a while, and had been confined to his home for several weeks. His wife, who was a sister of Mrs. Toomb, was fatally burned a year ago last summer, caused by trouble with a gasoline stove at the Wilson residence. Mr. Gossett served in the late war in the U. S. Navy, and was a pensioner. He was one of the victorious crew in the Monitor, when that death-dealing vessel was in the historical engagement with the Rebel vessel, the Merrimac. It was the hottest and one of the most important naval engagements of the war.

Mr. Gossett has a number of brothers and sisters. The time of the funeral will be fixed to-morrow.

## IMPUDENT BANDITS.

Bill Cook Sends a Message to Marshal Crump

### THE ROBBERS AFTER THE DEPUTIES.

And Only Two Hours Behind Them—Safe in the Creek Nation, the Home of the Lawless—Two of the Bandits Sighted.

Two of the Bandits Sighted.

WAGONER, I. T., Oct. 30.—To-day, about 1 p. m., as W. H. Baldridge and John Shade were riding near Virgil's river, five miles west of Wagoner, their attention was attracted by two men heavily mounted. The horses were recognized as those ridden by Diamond Dick and Cherokee Bill on the night of the Missouri Pacific hold-up at Corbett. When Baldridge and Shade were within 300 or 400 yards the strangers waved their hands and Winchester for Baldridge and Shade to move on. No attention being given to their signals the two strangers opened fire with their Winchesters, the bullets coming within a foot or two of their mark.

Baldridge and Shade made haste for Wagoner. Upon hearing their story a posse of six or seven citizens, headed by Marshal Joe Casaver, was quickly organized and a chase was given to the outlaws, who, it was found, had gone directly north.

One of Cherokee Bill's horses was returned to the pasture nine miles north of town last night. It is thought the entire gang is in hiding but a short distance from Wagoner. The five men arrested yesterday as harborers of the outlaws were turned over to the deputy marshals at Fort Gibson, and were taken to Fort Smith last night and placed in jail for safe keeping.

The Height of Impudence Reached.

FORT SMITH, Ark., Oct. 30.—It would seem that the height of impudence had been reached in the history of the Cook gang. To-day Marshal Crump received a message from Bill Cook stating that he was after his deputy marshals, was only two hours behind them and expected to overtake them soon at Coates.

A gentleman who lives near Coates, in the Cherokee nation, to-day stated that he saw five members of the gang ride away from John Davis' house Sunday morning. Davis was placed under arrest about a week ago charged with harboring members of the gang. This gentleman stated that the gang was headed for Brush creek, out in the Creek nation, where it is absolutely dangerous for a white man to go. That section is infested with as lawless and desperate scoundrels as ever went unhung.

Home stealing is the favorite pastime of many of the residents of that portion of the territory. Deputy marshals give that section a wide berth, and if the Cook gang takes refuge in that part of the territory they will be in a position to laugh at the pursuing officers.

Deputy Marshal Joe Bowers arrived to-day, having in charge Leon Perry, who was arrested two miles from Corbett, where the Missouri Pacific train was held up on the night of the 20th.

The officers have positive information that he is one of the Cook gang. He has been keeping horses for the crowd, and acting as a fence keeper and news carrier for them for a long time. In addition to this the officers have evidence that he has been doing a little horse stealing business on his own hook for some time. He is about 35 years of age and as sharp as a briar.

### A BOLD ROBBER

Holds Up a Stage Single-Handed, Murdering the Driver.

NEVADA CITY, Cal., Oct. 31.—Arthur Meyer, one of the proprietors of the North Bloomfield stage line, was shot and instantly killed by a robber while on the down trip yesterday afternoon. The murder occurred three miles above this city and within a quarter of a mile of where a highwayman murdered Banker Cummings in 1879.

Meyer was driving, and the only passenger was C. H. Boyce, of Sierra county, who was on the box with him. Meyer stopped the four-horse team at first sight of the robber, who commanded him to dismount. He refused, when the robber fired twice with a pistol, the second shot passing through Meyer's body. Meyer fell dead, his boot on the reins preventing the horses from running off.

Boyce jumped from the stage at the first shot and ran into the forest, three bullets being sent after him. The robber is not known to have stolen anything.

### THE REICHSBANK

Authorized to Advance on All Russian State Securities.

BERLIN, Oct. 31.—The executive committee of the Reichsbank held a meeting yesterday. The president of the institution declared that the position of the bank was exceptionally strong. The gold purchases of the bank had been 15,000,000 marks greater in 1894 than in 1893. The bank was authorized by a vote of the committee to advance on all Russian state securities with a fixed interest, payable in gold, and also on Russian railway preference shares, of which the interest is payable in gold.

The Spanish Cabinet Resigned.

MADRID, Oct. 31.—The cabinet resigned yesterday because the ministers could not agree as to several measures to be introduced in the coming session of the cortes, most notably the proposed extension of the tariff. Queen Regent-Salazar accepted the resignation but is understood to have refused to accept the resignation of a new cabinet. Several of the ministers will join him.

### SALISBURY ON ROSEBERY.

The Ex-Prime Minister Thinks His Successor Has Drawn a Big Herring in the Way of Home Rule.

LONDON, Oct. 31.—Lord Salisbury, speaking in Edinburgh yesterday afternoon, replied to Lord Rosebery's speech against the house of lords. The prime minister, he said, had drawn a big herring in the way of home rule, but it was evident that during his Bradford address he mentally if not actually held his tongue in his cheek. Lord Rosebery had no more power than anybody else to determine the subject which would be referred to the voters on the next election. To submit a detailed measure for the decision of the electors was certainly an honest proceeding, and in the form in which it existed in the states was decidedly advantageous to good government and the stability of the country. However, Lord Rosebery had not stated his project, but had merely asked that a blank check be drawn in favor of his instruments in the house of commons. It was ridiculous to suppose that the English and Scotch electors would place their necks under the feet of men in the west and south of Ireland who had sent Archbishop Walsh's battalions to Westminster. If the liberals would only drop this ruinous Irish policy the parties in the house of lords would be found more evenly balanced than ever before. He must warn the people earnestly against an unrestrained representative chamber. Urging new theories prompted cowardice. In closing his address Lord Salisbury expressed confidence that Joseph Chamberlain's democratic proposals would receive the hearty support of the unionists of all sections.

### CHINESE SLAUGHTERED

In the Ineffective Defense of Chu-Leang-Cheng—Marching Against Moukden.

TIENTSIN, Oct. 30.—The greater part of the Chinese force was destroyed before Chu-Leang-Cheng was evacuated. Gen. Hung's official report praises the valor of the troops, but confesses that they were outmatched by the enemy's weapons and training.

A dispatch from Peking says that the government is assuming a complete initiative in national affairs, which have hitherto been directed by Li Hung Chang, Colven Hannakin, the German officer who was formerly aide-de-camp of Li Hung Chang, and who rendered great service to the Chinese admiral at the great battle fought between the fleets of China and Japan, has been summoned to Peking by imperial edict to consult with the government in regard to the military situation.

HIOCHIMA, Oct. 30.—The Japanese forces which have been pursuing the Chinese north of the Yalu river captured at Antung twenty guns, many rifles and quantities of ammunition and provisions.

YOKOHAMA, Oct. 31.—Hearing that the Chinese fleet had left Wei-Hai-Wei, the Japanese fleet has started eastward in search of the Chinese vessels.

The Chinese Forces Again Defeated.

WASHINGTON, Oct. 31.—Secretary Gresham yesterday received the following cablegram from Minister Denby at Peking:

"Chinese forces have been defeated at Chin-Lien-Ling, and have retreated to Moukden. Japanese have taken one fort at Port Arthur."

### A SENSATION

Sprung by a Catholic Priest Endorsing Senator Pettigrew for Re-Election.

SIOUX FALLS, S. D., Oct. 31.—A sensation has been sprung here by the fact that Bishop Marty, Catholic bishop of South Dakota, has sent out letters to the priests of the state urging them to use their influence for the re-election of Senator Pettigrew.

On the letters are written in typewriter the list of the republican legislative candidates, and underneath in pencil is this: "Please use your influence for the election of the above-named candidates to the end that Pettigrew may be sent back to the senate."

[Signed] M. MARTY, Bishop. The bishop, in an interview, admitted that he believed the election of Mr. Pettigrew an important matter, just now, for the prosperity of the state as a whole, as defining its position on financial questions.

### INCREASED THE REWARD

For the Apprehension of the Perpetrators of the Dynamite Outrage, near Fairview, Pa.

WILKESBARRE, Pa., Oct. 30.—The county commissioners to-day increased to \$2,000 the reward offered for the apprehension of the persons who blew up with dynamite the building containing a number of Hungarians near Fairview on Sunday. Another victim, whose back was broken, died from his injuries yesterday morning, making the fourth fatality. A fifth victim may die, but the others are expected to recover. There is no clue to the perpetrators.

### A Firm of Swindlers Restrained.

LONDON, Oct. 31.—Owing to complaints received at the United States embassy, by the lord mayor of London and by other officials, the police of Scotland Yard and the officials of the United States legation have broken up the swindling operations of a firm of patent lawyers doing business in Chancery lane. In addition, the United States embassy warns American inventors not to answer circulars offering to obtain English patents unless they are satisfied that these communications come from duly authorized patent agents.

### Wife-Murder and Suicide.

NEW YORK, Oct. 30.—Maggie Matz, German, 32 years of age, was shot and killed this evening by her husband, Fritz Matz, a baker. Matz then put a bullet into his own head and died instantly. The shooting was the result of a quarrel.

## A FRIGHTFUL WRECK

In Which Three Unknown Men Are Killed

### AND LEWIS T. TRUMP IS BADLY INJURED

Eleven Coal Cars Piled Up in a Confused Mass by a Brake Beam Dropping—The Dead Men Supposed to be Burglars.

WILLIAMSPORT, Pa., Oct. 31.—A frightful coal train wreck in which three unknown men were killed and Lewis E. Trump, of Williamsport, was badly injured, occurred about three-quarters of a mile east of Viaduct, a station near Peale, on the line of the Beech Creek railroad at an early hour yesterday morning.

A coal train was moving past Viaduct when one of the brake beams dropped, and the result was a bad wreck, eleven cars being piled up in a confused mass.

The first dead man found had his head entirely severed from his body. The other two who were killed were not discovered by the trainmen until they had the tracks about cleared, and then they were found under a coal car. There was nothing about either of the dead men by which they could be identified, but it is supposed that they were either tramps or burglars, as in their clothes was found a lot of burglars' tools, seven masks, three revolvers and a number of cartridges.

Lewis Trump, the Williamsport man, who was on the same train and was badly injured had his skull fractured and was otherwise hurt. The physician thought he would die at the scene of the wreck, but he grew better on reaching the Cottage hospital at Philadelphia; but it is not yet known if he pulls through.

### MORROW'S SORROW

Caused by a Newspaper Article Exposing Alleged Domestic Intelicity.

TOLDO, O., Oct. 30.—Col Isaac Morrow, of Columbus, inspector of immigration at this port, astonished his friends and the public, with whom he is well acquainted, two weeks ago, by marrying Miss Edith Gilmore, who had taken part in the beauty show at the Toledo exposition. The colonel is nearly 70 years of age, while Miss Gilmore is scarcely out of her teens. The colonel and his young bride went to house-keeping on Madison street, and the gossip occasioned by their somewhat romantic union had scarcely died away when a local paper came out with a sensational story alleging that Mrs. Morrow was about to seek a divorce.

Since the marriage, the paper in question says, Col. Morrow has watched her every movement with jealous eyes, following her like a dog wherever she went and abusing her with his tongue.

On several occasions he is charged with laying violent hands on her. The colonel was furious to-day when he read the article in question. His co-workers in the federal building sought to pacify him, but in vain. Finally the colonel sat down and wrote a challenge to Maurice Schloenbach, the newspaper man who wrote the article, and says he will have revenge at any cost. The colonel denies that he has in any way been unkind to his wife.

### THE PRESBYTERIAN ALLIANCE.

Meeting of the Executive Committee at Baltimore Yesterday.

BALTIMORE, Md., Oct. 31.—The executive committee of the Western or American section of the Alliance of the Reformed Presbyterian churches, met at the Franklin-street Presbyterian church yesterday morning. Some of the most prominent Presbyterian divines of the country, well-known bankers, lawyers and merchants from all over the United States and Canada were present. It was the most memorable gathering of Presbyterians that has ever occurred in Baltimore.

The entire Western or American section of this alliance, which is composed of all reformed churches throughout the world holding a Presbyterian system, includes over ninety denominations. At yesterday's meeting matters were discussed connected with the welfare of the church which will come up at the approaching yearly meeting of the Pan-Presbyterian congress which will meet at Glasgow, Scotland. Rev. W. U. Markland, pastor of the Franklin-street church, presided over the business session.

### MYSTERIOUSLY MISSING.

A Cincinnati Man Draws One Thousand Dollars from Bank and Disappears.

CINCINNATI, Oct. 30.—The police department was yesterday called upon to aid in the search for Clarence Evans, son of well known and well-to-do parents of this city. With a partner, he has been building a large livery barn at Norwood, a suburb. Saturday he went to his bank and drew \$1,000 to pay the contractor and has not been seen since. His family and friends think he has been murdered.

When he left home he left behind a handsome diamond ring and put on his working clothes. The firm had \$1,200 in the bank, yet he drew only enough to pay the bills due. His interests at Norwood are worth far greater than the sum taken.

### FRAUDS ON THE REGISTRY.

Two Hundred and Forty Cases Reported and More to Follow.

NEW YORK, Oct. 31.—Five police captains of east-side lodging-house districts were at police headquarters yesterday morning in consultation with Sgt. Byrne. When it was over the captains went down to the district attorney's office. The superintendent said, after they were gone, that they had reported some 340 cases of fraud on the registry to him, with more to follow.

Gen Harrison will make a short swing around the circle on his return from New York next Saturday, making six speeches in the gas belt, and holding a big meeting at Anderson, Ind.

Five men were killed in a wreck on the Beech Creek railroad near Clearfield, Pa., an examination of whose effects showed them to be a gang of burglars. They were otherwise unknown.

Gen. von Werden, German ambassador at St. Petersburg, has been directed to convey to the czar an expression of Emperor William's pleasure at hearing of his improved condition.

The steamer Zambesi, formerly a Northern Pacific steamer, but recently purchased by some wealthy Japanese, ran into the Japanese war ship Teubken in Kobe harbor last month and sunk her.

While an entertainment was in progress at Nazas, in the state of Durango, Mexico, the building collapsed. A large number of persons were caught under the falling timbers and badly injured, and three were killed outright.

The cutting-room employees at the Standard pearl-button works at Detroit, Mich., eighty in number, went on strike yesterday morning. They demand the removal of a new foreman, whom they claim was formerly the foreman of a button shop in an Illinois prison.

The Berlin Reichsanzeiger publishes a decree extending to Mecklenburg-Schwerin, Schleswig-Holstein, Bremen and other parts of Germany the prohibition against the landing of American cattle and dressed meat pronounced last week by the Hamburg senate.

John Moody, who claims to be a resident of Kansas, was fatally injured about 1 a. m., yesterday, at Chester, Ark., by jumping from a moving freight train. Both legs from the knee to the ankle were mashed to a pulp, and both arms from the elbow to the wrist were also fearfully mangled.

### MUST CEASE TO ACT

As a Deputy of France While Serving as a Soldier.

PARIS, Oct. 31.—The chamber of deputies had a field day yesterday over the question whether Deputy Mirman, having been called upon to serve as a soldier, may continue to sit in the chamber of deputies.

The chamber, by a vote of 307 to 215, approved the government's attitude that M. Mirman's legislative functions must be suspended.

At the announcement of the vote M. Jaures shouted: "That is a slave's vote."

The socialist deputies continued a tremendous uproar for several minutes.

A Winter Rice Famine Inevitable.

LONDON, Oct. 31.—A dispatch from Tien-Tsin to the Central News says the government has allowed all steamers to carry cargoes of rice, but this permission was promulgated too late to prevent a winter rice famine.

Thirteen battalions of Hunanese troops have left Han-Kow for Chin-Kiang, whence they will proceed overland to Peking.

Wheel Works Burned.

DAVENPORT, Ia., Oct. 31.—The Bettendorf wheel works were almost totally destroyed by fire last night. Loss, \$40,000; insurance, \$18,000. The establishment was owned and operated by the Eagle iron works of this city. A boy was killed by a hose cart passing over his neck.

All Quiet in New Orleans.

NEW ORLEANS, Oct. 30.—The strike situation was devoid of excitement today owing to the fact that no attempt was made to work the negroes. The board of directors of the cotton exchange is trying to settle the trouble, but nothing definite has been accomplished so far.

### SIGHTINGS OF SCIENCE.

Mr. HIRSH S. MAXIM, the inventor,  
has thus far expended upon his flying  
machine \$17,000.

According to a French Journal, a  
Geneva firm is manufacturing phono-  
graphic clocks which talk the hour in-  
stead of striking it.

Mr. RICHARD GIRD, principal owner  
of a great beet-sugar factory in Chico,  
San Bernardino county, Cal., says there  
is enough beet land in California to  
supply the globe with sugar.

Dr. EHLESEN of Copenhagen, has  
made a special inspection four of  
southern Iceland to ascertain the num-  
ber of lepers, and found fifty-three, or  
twice as many as expected. A hospital  
is to be built to prevent further spread  
of the disease.

On August 16 last, between ten and  
eleven o'clock a beautiful mirage  
was seen at Buffalo, N. Y. Toronto,  
Can., fifty-six miles away, with its har-  
bor and a neighboring island, were  
plainly visible. Even the church spires  
of the Canadian city could be counted.  
It is estimated that 80,000 people wit-  
nessed the phenomenon.

An analysis of water taken from the  
Great Salt Lake, Utah, in August, 1888,  
showed that a ton of such water would  
contain 391 pounds of solid matter, of  
which about 314 pounds would be com-  
mon salt. Dead Sea water contains  
only 151 pounds of salt to the ton, but  
the proportion of solids is much greater,  
there being about 228 pounds to the  
ton.

It is reported that a lampwick of  
clay, that will give twenty-five per  
cent more light than a cotton wick,  
has been invented. It is made capillary  
by incorporating with the clay, while  
still plastic, filaments of unspun vege-  
table fiber, which, burned out in the  
baking, leave minute tubes running  
through the wick, through which the  
flame draws the oil by capillary attrac-  
tion. The flame thus fed, it is claimed,  
is white, odorless and smokeless, while  
the novel wick itself is almost inde-  
structible.

### ECHOES OF THE RAIL.

IOWA railroad commissioners are in  
favor of a law restricting or prohib-  
iting the running of trains on Sunday.

The Union Depot Street Railway  
company of St. Louis has decided to  
put in operation an electric street rail-  
way ambulance.

A freight car on the electric road  
running between Albany and Troy  
makes three round trips daily. There  
is a freight depot in each city, and de-  
livery wagons are run about the city to  
gather goods.

Two passenger trains on the Balti-  
more & Ohio railroad have been pro-  
vided with electric rail lights. The  
two cars are also provided in the ob-  
servation end with electric fans, which  
are operated by the same batteries that  
give the current for lighting.

According to the press dispatches the  
Baltimore & Ohio railroad has decided  
at Mount Sterling, O., the other day.  
To enforce payment of a judgment of  
\$500 against the company the sheriff  
chained the engine of a passenger train  
to the track, but, after communicating  
with headquarters, the train was start-  
ed, snapping the chain and leaving the  
sheriff behind.

### FOWL, FISH AND SERPENT.

A BOA-CONSTRUCTOR, which lives in the  
Adelaide zoological gardens, caught  
its fangs the other day in a rug. Being  
unable to disengage itself, it proceeded  
to swallow the rug, which was seven  
feet by six in size.

A STURGEON weighing 1,440 pounds  
was caught in the Caspian sea two  
weeks ago. The head alone weighed  
328 pounds, and the fish furnished about  
120 pounds of roe for caviare. The fish  
was sold for \$160.

The most formidable check to the in-  
crease of serpents and venomous insects  
in the tropical regions is the abun-  
dant of ants which, attacking in thou-  
sands, will kill and devour animals  
often of considerable size.

THERE is a mystery about the method  
of motion of condors that has never  
been explained. They have been seen  
to circle to and fro in the sky, half a  
day at a time, rising and descending  
without once flapping a wing.

### THINGS IN GERMANY.

GERMANY'S proportion of suicides is  
larger than that of any other European  
country.

The number of telephonic stations in  
Germany was 1,504 in 1881, had in-  
creased at the beginning of the present  
year to 63,538.

An international matrimonial paper  
is about to make its appearance in Ber-  
lin, Germany. The new journal will  
be printed in three languages—German,  
English and French.

GREAT discontent is shown in Ger-  
many at the large number of pensioned  
officers in the army. Since the present  
emperor ascended the throne in  
1888 4,000 have been forced to resign.

EISENBERG, the birthplace of Martin  
Luther, is sinking into the moor upon  
which it is built. Measures have been  
taken in recent years to drain the bog,  
without avail, and the inhabitants are  
seriously thinking of abandoning the  
town.

### POINTS FOR SCIENTISTS.

THE 132,856 craters which have been  
discovered on the moon are supposed  
to have been caused by a bombardment  
of aerolites.

SEA bathing causes many diseases of  
the ear. Cotton should be put in the  
ear when it is the intention to sub-  
merge the head.

ALL known chemical elements are  
represented in sea water. They are not  
always capable of being detected by  
chemical analysis.

THE theory that the remains of ani-  
mals form the raw material from which  
petroleum is formed by nature is still  
held by some prominent scientists.

THE Medical News says that even  
sewage water can be converted into  
pure drinking water by sand filtration.  
In Hiler begins at the rate of two mil-  
lion gallons per acre per day.

The favorite Little Pill everywhere. C.  
H. Dawson.

NEXT Tuesday night will tell the  
story.

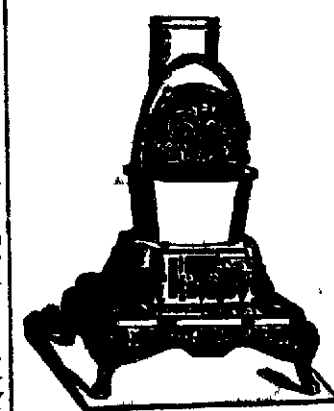

ONE word describes it—"perfection."  
We refer to De Witt's Witch Hazel  
Salve, cures obstinate sores, burns, skin  
diseases and is a well known cure for  
piles. C. H. Dawson.

**Cures  
Rising  
Breast**

**"MOTHERS'  
FRIEND"**

Is the greatest  
bleeding ever offered  
child bearing woman.  
I have been a mid-  
wife for many years  
and in each case  
where "MOTHERS' FRIEND" was used  
it accomplished wonders and relieved  
much suffering. It is the best remedy for  
rising of the breast known, and worth the  
price for that alone.

## Buy the **MOORE'S HEATER** Original

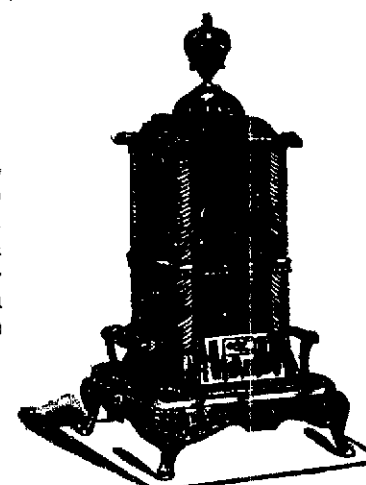

HERE we show you the Moore's  
Air Tight Heater without the  
outside jacket. What is it? Sim-  
ply an old style cannon stove, such  
as has stood the test for so many  
years in railway depots and other  
public buildings. This stove is  
cast in two sections and is per-  
fectly fitted and put together so as  
to make a

**PERFECTLY  
AIR TIGHT  
JOINT.**

It consumes less coal than other  
stoves and makes more heat.

## BALL BEARING GRATE.

THIS is the same stove, the  
Famous Moore's Air Tight  
Heater, with the fancy net-  
work jacket placed over the  
dome and firepot, thus making  
the old style cannon stove a  
neat parlor stove. We call it  
Famous because we have sold  
it since 1891 with wonderful  
success and it has indeed be-  
come famous. Remember with  
this network jacket the stove
